Backend Laravel Developer

I Can Move My Residence To My Workplace

OBJECTIVE

Backend Laravel Developer with a proven track record of delivering high-quality, scalable, and efficient web solutions. Possessing two years of hands-on experience in Laravel development, I have successfully completed multiple projects showcasing proficiency in database design, RESTful API development, and performance optimization. Adept at collaborating with cross-functional teams, I bring a comprehensive understanding of Laravel best practices, ensuring the creation of robust and maintainable code. Seeking challenging opportunities to leverage my expertise in Laravel development, contribute to innovative projects, and continue delivering impactful solutions in a dynamic and growth-oriented environment.

EXPERIENCE

- Regular Expression
- linux ubuntu
- jira
- xdebug

PROJECTS

Golden Host | Php Laravel & MySQL & Api & Jquery & Ajax & Bootstrap & ... — <https://goldenhost.co>

I participated in developing and maintaining the Golden Host website, which is a website specialized in managing residential units owned by property owners and requested to be rented by users.

Tik Event| Php Laravel & MySQL & Api & ... — <https://tikevent.com>

I have developed the Tik Event website It is an electronic website for trading tickets for events held in the Kingdom of Saudi Arabia...

It is based on the ticket holder uploading his ticket on the platform and waiting for the admin's approval to display the ticket on the site...

HOTEL | Php Laravel & MySQL & Laravel PDF & Spatie Image & Laravel Permission & — <https://rb.gy/hz9z8k>

It is a complete program that deals with hotel room reservations. It enables people to book rooms remotely or through the hotel because it is a complete program for managing the hotel and visiting people, which suggests rooms for customers to book and sends a PDF mail to visitors with their reservation.

In short, the program consists of a login page to access our application and a login to manage the hotel through the reception and the full control of the hotel in the rooms. This requires adding powers to the hotel employees to manage parts specific to their work.

Blog Post | Php Laravel & MySQL & Laravel Filament & Laravel Livewire — <https://rb.gy/boiulm>

A program that helps publish personal blogs through the admin and enables administrators to manage posts using the Laravel Filament method, which allows users to register on the site to interact with posts using the Like and Comment method and helps the admin deal fully with posts through his own control panel.

Job Board | Php Laravel & MySQL — <https://rb.gy/ji6yh2>

A program that helps employers publish the jobs available to them: It enables job seekers to search for the appropriate job through the various search process, apply for it, and send the CV only once, with the possibility of seeing jobs similar to this job.

Event Management| Php Laravel & MySQL & API

A program that relies on an API for a website to book events. It enables users to access a view of the booked events, and sends users an email 24 hours before the event to inform them of the date of the event in case they forget the date.

livewire Poll| Php Laravel & MySQL & Livewire

A program that helps the user create an opinion poll, display the available solutions, and enables users to vote for the best solution for them, and relies entirely on Livewire

Book Review| Php Laravel & MySQL — <https://rb.gy/jcqwnd>

A program that displays the books available on the site, and enables users to review each book
